Safety Committee Report

With the resignation of Gerald Estes as Committee Chair the LPOA President Paul Ellison asked Board Member Assistant Treasurer, and Safety Committee member Dave Fourman to take over as Chairman of the Committee, and he accepted.

The Committee has been discussing the need for the radios with the upcoming changes that the FCC is going to make, and would make a recommendation to the Board of Trustees for the purchase of the radios not only for Security, but for maintenance also.

There was further discussion on uniform shirts for Security, and what logos and such there should be and Dave Wilson was going to make a request to the Board of Trustees on the purchase of the shirts out of the allotted budget for uniforms.

The last previous two items have been a matter of discussion for the last two years, and have been worked on and brought to the BOT a couple of times. It should be noted that Gerald Estes worked on keeping them alive and kept working on getting the BOT to approve them.
